

## Jamf Pro Installer via Application

---

1. Download the **Jamf Install** application from the following location:

<https://tinyurl.com/fal-jamf-install>

2. Once downloaded locate the **Jamf Install.zip** file and double click the **Jamf Install.zip** file to decompress.

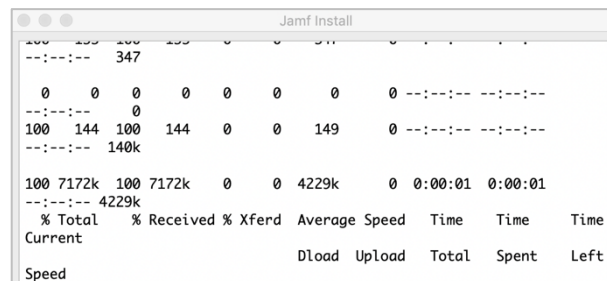

Jamf Install.zip

3. Once unzipped, double click to activate the **Jamf Install** application.

Jamf Install.app

4. The application will download and install the relevant files.

5. Once installed a **PDF guide** will appear with instructions on how to approve the Jamf profile (this is required for macOS High Sierra, Mojave and Catalina).
