# Jamf Pro – MDM Profile Approval

If you are using macOS High Sierra, Mojave or Catalina, you must approve your Jamf Pro enrolment to manage security-sensitive settings.

1.   Locate and open:

System Preferences   ➜   **Profiles**

2.   In the **Profiles** dialog box, locate the **MDM profile** it will have a badge if it requires **Approval**.

3.   Select the **MDM profile**, click the **Approve** button on the right, and follow the prompts.
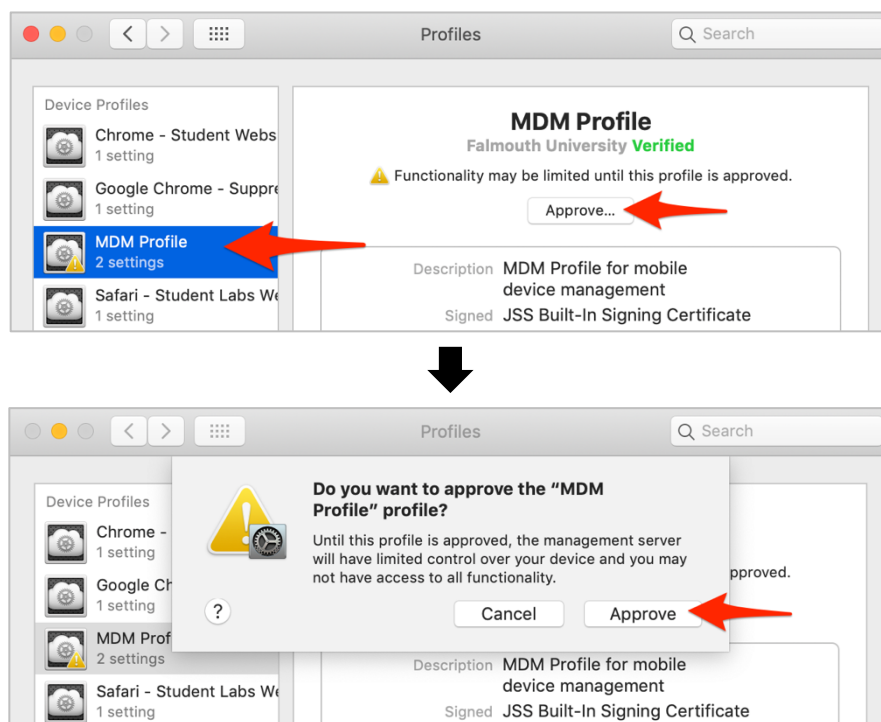

4.   Once approved the **MDM Profile** will display **Verified**.
